

## What's New in the Perinatal Orientation and Education Program (Coming June 2024)

- Reorganized to focus on the needs of the novice perinatal nurse
- Reproductive & Women's Health modules consolidated to be a Reproductive Overview
- Complications modules provide overview of systems, divide out perinatal infections, antepartum issues, and postpartum complications
- New Newborn specific modules - Newborn Transition, Newborn Conditions Affecting Care and Outcomes, Newborn Deterioration, Newborn Nutrition
- Multiple narrators, with the ability to speed up and slow down the speed of narration
- Short videos integrated throughout to enhance content- with building relationships, caring for patients, patient testimonials, and more
- Increased interactivity with integrated case studies and knowledge checks
- POEP Study Guide Workbook to use in conjunction with the program
